

Clapham Common n. London
12 March 1872

My dear Dr. Asa Gray

I have at length made up
for you a little box, which
will, I hope, find its way in
due time to Cambridge, Mass.,
without very extravagant charges
for freight &c.

A list of the contents is here-
with. Each packet I have
ticked with particular care,
giving rather fuller ~~part~~ details
than in the list.

Most of the specimens are things
which one could not buy in the
way of trade, and a good many
of them are what have been
described at various times in
the Pharmaceutical Journal.

Believe me to remain

Yours very sincerely
Dan Hanbury

Professor Asa Gray.
